WWW: portfolio.khangvo.dev

Summary

Junior Developer with 8 months of experience developing robust backend solutions using ASP.NET, Entity Framework Core, PostgreSQL, and MongoDB. Actively building full-stack proficiency with React and Next.js. I'm seeking a junior backend or full-stack position where I can contribute to the development of modern, high-performance web applications.

Skills

- C#, JavaScript, TypeScript, Python
- Git, Azure VMs, Vercel, Linux, and Docker
- ASP.NET, Entity Framework Core, Express, NestJS, Flask

- HTML/CSS, TailwindCSS, Shadcn, Bootstrap 5, Next.js
- PostgreSQL, MySQL, MongoDB, and Redis

Experience

04/2023 - 11/2023 | **Backend Developer - Estuary JSC**

- Developed backend APIs for the mobile app and admin panel, including a virtual running app and a lucky draw event system.
- Collaborated with QA, and cross-functional teams to resolve bugs and implement feature updates.
- Participated in code reviews and sprint planning meetings, and used GitLab for version control.
- Designed and implemented credential authentication flows utilising JWTs, facilitating seamless single sign-on (SSO) across multiple applications.
- Worked with C#, .NET, EF Core, PostgreSQL, MongoDB, and background services.

Education and Training

Expected in 2027 Brisbane, QLD	**Master of IT** Queensland University of Technology
12/2023 Ho Chi Minh City	**Bachelor of Information Technology** Ho Chi Minh City University of Technology - HUTECH

Projects

05/2025 - 06/2025
QUT University
Brisbane, QLD

Full Stack Developer - Grocery Store

Team size: 5

Technologies:

- Python, Flask, Jinja2, Bootstrap 5, MySQL, and Azure VMs.

Contributions:

- Defined the project architecture and tech stack.
- Deployed and managed a MySQL database on Azure VMs using Linux and Docker.
- Implemented session-based authentication and role-based authorisation.
- Developed core application features with Python (Flask), Jinja2, and Bootstrap for rapid prototyping.
- Designed foundational UI/UX in Figma.
- Ensured code quality and consistency across an international team through coordination and reviews.

Git Repositories:

- https://github.com/IFN582/grocery-store

01/2022 - 06/2022
HUTECH University
Ho Chi Minh City

Full Stack Developer - Movie Website

Team size: 3

Technologies:

- .NET Core 6, RESTful API, Entity Framework Core, PostgreSQL, React, Git, Firebase.

Contributions:

- Developed and maintained backend RESTful APIs on ASP.NET Core 6, leveraging Entity Framework for ORM, and PostgreSQL for data persistence.
- Built a dynamic, responsive SPA dashboard using React, TypeScript, and Material UI.
- Implemented JWT-based authentication, integrating role-based authorisation for granular access control.
- Implemented a robust background job processing system using Hangfire to manage and execute asynchronous tasks, improving system performance and user experience.
